Project Title: Darshan Ease

Project Design Phase-I - Solution Fit Template

Team ID: PNT2022TMIDxxxxxx

Define CS, fit into CC

1. CUSTOMER SEGMENT (CS)

1. Devotees / Temple Visitors (Primary Users)
2. People who want to book darshan slots online.
3. Includes families, individuals, and pilgrims visiting temples.
4. Especially helpful for elderly devotees who want to avoid long queues.
5. Temple Management / Temple Authorities
6. Temple administrators who want to manage crowd flow efficiently.
7. They can create darshan slots, monitor bookings, and control capacity.
8. 3. Pilgrimage Tourists / Travelers
9. People traveling from different cities or states for temple visits.
10. They prefer pre-booked darshan slots to plan their trips better.
11. 4. Travel Agencies / Pilgrimage Tour Operators (Future Segment)
12. Agencies organizing religious tours or pilgrimage packages.
13. They can use the system to book darshan slots for groups.

6. CUSTOMER CONSTRAINT (CC)

1. 1. Limited Digital Literacy
2. Some devotees, especially elderly people, may not be familiar with using online platforms for booking darshan slots.
3. 2. Internet Access
4. Users in rural or remote areas may have limited internet connectivity, which can make online booking difficult.
5. 3. Trust in Online Systems
6. Some devotees may prefer traditional queue systems and may initially hesitate to trust online booking for temple visits.
7. 4. Device Availability
8. Not all users may have access to smartphones or computers required to use the online booking system.
9. 5. Language Barriers
10. Users from different regions may face difficulties if the platform is not available in multiple regional languages.

6. AVAILABLE SOLUTIONS (AS)

1. Physical Queue System
2. Most temples currently manage darshan through long physical queues, where devotees wait for several hours to get darshan.
3. Manual Token Distribution
4. Some temples distribute manual tokens at the temple premises for specific time slots, but this still requires devotees to be physically present.
5. Limited Online Booking Systems
6. A few large temples provide basic online darshan booking systems, but these systems are often limited to specific temples and are not widely accessible.
7. VIP / Special Darshan Passes
8. Some temples offer VIP or special darshan passes, which allow faster access but are not available to all devotees.

2. JOBS-TO-BE-DONE / PROBLEMS (J&P)

1. Long Waiting Queues in Temples
2. Devotees often have to stand in long queues for several hours to get darshan, especially during weekends, festivals, and special occasions.
3. Poor Crowd Management
4. Temple authorities find it difficult to manage large crowds efficiently, which can lead to overcrowding, confusion, and safety issues.
5. Lack of Advance Planning
6. Devotees cannot plan their temple visits in advance because darshan is usually based on physical queues instead of scheduled slots.
7. Inconvenience for Elderly and Families
8. Senior citizens, children, and families face difficulties standing in long lines for darshan.
9. Uncertainty of Darshan Availability
10. Devotees are often unsure whether they will be able to get darshan after traveling long distances.
11. Temple staff have to manually manage queues and visitors, which is inefficient and time-consuming.

6. PROBLEM ROOT CAUSE (RC)

1. Lack of Digital Queue Management
2. Most temples still rely on manual queue systems, which leads to overcrowding and long waiting times.
3. 2. Absence of Advance Slot Booking
4. Devotees cannot book darshan slots in advance, forcing them to wait in physical queues at the temple.
5. 3. High Number of Visitors
6. Popular temples receive thousands of visitors daily, especially during festivals and weekends, making crowd management difficult.
7. 4. Inefficient Visitor Flow Management
8. Without a proper scheduling system, temple authorities cannot distribute visitors evenly throughout the day.
9. 5. Limited Technology Adoption
10. Many temples have not adopted modern digital systems for managing darshan appointments and visitor records.

7. BEHAVIOUR (BE)

1. Visiting Temples Early to Avoid Crowds
2. Devotees often arrive very early in the morning to reduce waiting time, but still end up standing in long queues.
3. Standing in Long Physical Queues
4. Most devotees wait in traditional queue lines for hours to get darshan.
5. Asking Temple Staff for Information
6. Visitors usually rely on temple staff or volunteers to know about waiting times and crowd conditions.
7. Planning Visits During Off-Peak Hours
8. Some devotees try to visit temples on weekdays or during less crowded hours to avoid heavy crowds.
9. Following Crowd Movement
10. Devotees typically follow the crowd and temple announcements instead of having a structured booking system.

3. TRIGGERS (T)

1. Planning a Temple Visit
2. When devotees plan a visit to a temple, they look for ways to avoid long queues and waiting times.
3. Long Waiting Experience
4. After experiencing long waiting hours during previous temple visits, devotees are motivated to look for a better solution.

4. EMOTIONS: BEFORE / AFTER (E)

1. **Before Using the Solution**
   - Frustrated due to long waiting queues
   - Tired after standing in line for hours
   - Uncertain about whether they will get darshan
   - Stressed due to overcrowding and lack of organization
2. **After Using the Solution (DarshanEase)**
   - Relaxed because darshan slots are pre-booked
   - Confident about getting darshan at the scheduled time
   - Comfortable planning temple visits in advance
   - Satisfied with a smooth and organized darshan experience.

10. YOUR SOLUTION (S)

1. DarshanEase is a web-based platform that allows devotees to book darshan slots online for different temples in advance. The system helps reduce long queues and improves crowd management by providing scheduled darshan time slots.
2. The platform provides two main functionalities:
3. For Devotees (Users):
4. Browse temples available on the platform
5. View available darshan slots for specific dates and times
6. Book a convenient darshan slot online
7. Manage and track their bookings
8. For Temple Administration (Admin):
9. Add and manage temples on the platform
10. Create darshan slots with specific dates and times
11. Set the number of available seats for each slot
12. Monitor and manage bookings efficiently
13. By implementing a digital slot booking system, DarshanEase ensures better crowd control, reduced waiting time, and a smoother darshan experience for devotees.

8. CHANNELS OF BEHAVIOUR (O)

1. **Online Channels**
   - Official DarshanEase website for browsing temples and booking darshan slots
   - Mobile browsers or future mobile application for easy booking
   - Social media platforms for awareness and updates about temple slots
   - Online search (Google) when devotees look for darshan booking options
2. **Offline Channels**
   - Temple notice boards or counters informing devotees about the online booking system
   - Word of mouth recommendations from friends, family, or other devotees
   - Temple staff guidance helping devotees use the system for booking slots
   - Pilgrimage travel agencies recommending the platform for darshan booking
