Project Design Phase-I
Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMIDxxxxxx
Project Name	Project -Darshan Ease
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many popular temples experience **large crowds and long waiting times for darshan**, especially during weekends, festivals, and special occasions. Devotees often have to **stand in long queues for hours**, leading to inconvenience, overcrowding, and poor crowd management. Additionally, temples struggle with: • Managing visitor flow efficiently • Ensuring fair access to darshan • Maintaining safety and discipline during peak hours There is a need for a **digital system that allows devotees to book darshan slots in advance**, reducing waiting time and improving crowd management.
2.	Idea / Solution description	**DarshanEase** is a **web-based temple darshan slot booking system** that allows devotees to **book darshan slots online before visiting the temple**. The system provides: For **Admin (Temple Management)**: • Add temples to the platform • Create darshan slots for specific dates and times • Define the number of available seats for each slot • Monitor bookings For **Users (Devotees)**: • Browse available temples • View available darshan slots • Book a slot for a specific date and time

		• Manage their bookings This system ensures **organized darshan scheduling, reduced queues, and better temple crowd management**.
3.	Novelty / Uniqueness	The uniqueness of **DarshanEase** includes: • **Slot-based darshan management system** • **Digital queue management for temples** • **Real-time seat availability for darshan slots** • **Admin-controlled slot creation and capacity management** • **Improved crowd distribution across time slots** Unlike traditional temple visits where devotees wait in long queues, **DarshanEase introduces a structured appointment-based darshan system**.
4.	Social Impact / Customer Satisfaction	DarshanEase provides several **social benefits**: • Reduces **long waiting times for devotees** • Prevents **overcrowding in temples** • Improves **safety and crowd control** • Provides **convenience for elderly people and families** • Enhances **overall spiritual experience** Devotees can plan their visit peacefully, knowing their **darshan slot is already reserved**. Temple authorities also benefit from **better management and operational efficiency**.

5.	Business Model (Revenue Model)	The platform can generate revenue through multiple models:
		1. **Convenience Fee**
		  ○ Small booking fee per darshan slot (₹5 – ₹20)
		2. **Temple Subscription Model**
		  ○ Temples pay a **monthly platform management fee**
		3. **Premium Darshan Slots**
		  ○ Special priority slots with higher booking charges
		4. **Advertisements**

		○ Religious events, spiritual services, nearby hotels, and travel services 5. **Donation Integration** ○ Devotees can donate to temples directly through the platform
6.	Scalability of the Solution	DarshanEase is designed to be **highly scalable**. Future expansion possibilities include: • Supporting **hundreds of temples across different cities** • Mobile application (Android / iOS) • Integration with **UPI / payment gateways** • Festival crowd management • AI-based **crowd prediction and slot optimization** • Integration with **travel and pilgrimage planning platforms** With cloud deployment, the system can support **thousands of users booking darshan slots simultaneously**.
